

Manish Kumar

GenAI Developer | LLM API Integration & Full-Stack Development

hello@manishai.xyz | +91 84354 28491 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

SUMMARY

Full-stack developer focused on building and shipping applications that integrate LLM APIs into real-time, production workflows. Built a WhatsApp AI agent (Groq LLM + Twilio webhooks) that processes and responds to live customer messages, currently in distribution with some clients. Experienced with Gemini AI and Groq for LLM integration, and FastAPI/Node.js for backend architecture and API design. Comfortable across the full stack — from React/Next.js frontends to database design and third-party API integrations.

EXPERIENCE

Frontend Developer — AI & Automation | BoomX Media Jun 2025 – Jan 2026

- Built internal AI-powered automation tools that streamlined 3–4 recurring workflows in the company's service management platform, reducing manual work for the team.
- Developed a Chrome browser extension that auto-generated message IDs for internal interfaces, adopted by 15 team members and eliminating manual data entry.
- Shipped 4 end-to-end product features as part of the platform's AI-enhanced and automation-focused initiatives.

Full-Stack Developer — MyAppBroker (Freelance) Jan 2025 – Mar 2025

- Built a responsive consultancy website (React, Firebase) with an admin panel and CRUD functionality, increasing form submissions by 30% through real-time validation.
- Implemented backend authentication and form validation logic, reducing invalid submissions by 36%..

PROJECTS

FlowForge — Visual Pipeline Builder [view](#) Jul 2026

- Built a **drag-and-drop workflow canvas** (as a technical assignment project) using **React** and **TypeScript**, with 9 node types and a reusable BaseNode abstraction to eliminate component duplication.
- Implemented a backend **DAG validator** using **depth-first search (DFS)** to detect cycles and validate pipeline correctness before execution..

WhatsApp AI Agent [view](#) May 2026

- Built an AI-powered WhatsApp chatbot using **Groq LLM**, **Node.js**, **Express.js**, and the **Twilio WhatsApp Business API** to automate customer support and sales conversations with natural, human-like responses.
- Engineered a stateless backend with **webhook-based real-time messaging**, **REST APIs**, and **prompt engineering** for context-aware replies, plus a dashboard for conversation insights.
- Currently running the agent on a live WhatsApp number for direct outreach and demos to onboard business clients.

AI Resume Builder [view](#) Mar 2026

- Built an AI resume-tailoring app using **Next.js**, **TypeScript**, and **Tailwind CSS**, with client-side **PDF/DOCX parsing** (pdfjs-dist, mammoth) — no server-side data storage.
- Integrated **Google Gemini AI** to rewrite resumes against a target job description with clarifying questions, before/after **ATS match scoring**, and 4 downloadable templates.
- Added cover letter and interview-prep generation, with animated **PDF export** via `@react-pdf/renderer`..

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, Python, React.js, Next.js, Node.js, Express.js, FastAPI

AI & LLMs: Gemini AI, Groq, LLM API Integration, Prompt Engineering, AI Automation Workflows

Backend & APIs: REST APIs, Webhooks, Firebase Auth, Real-time Messaging

System Design: DAG Algorithms, Cycle Detection (DFS), State Management

Tools & Platforms: Git, GitHub, Vercel, Twilio, Figma, Postman, ESLint

CERTIFICATIONS

The Web Developer Bootcamp — Udemy (Colt Steele), 74 hours, Apr 2024

Artificial Intelligence Builder — FITT-IIT Delhi, 80 hours, Jan–Mar 2024

EDUCATION

Electronics & Telecommunication Engineering
Jabalpur Engineering College, Madhya Pradesh

Sep 2021 – May 2025
