

Manish Kumar

MERN Stack Developer | MongoDB / Express / React / Node.js
hello@manishai.xyz | +91 84354 28491 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

MERN Stack Developer with 8+ months of experience building full-stack JavaScript applications end-to-end — from **MongoDB** data models and **Express/Node.js APIs** to production **React and Next.js** interfaces. Shipped a full e-commerce platform serving 1,000+ users, along with backend-heavy projects involving authentication, payments, and real-time data. Comfortable owning the entire stack, from schema design to deployment.

EXPERIENCE

MERN Stack Developer — BoomX Media Jun 2025 – Jan 2026

- Translated 20+ Figma designs into pixel-perfect **React components**, eliminating UI inconsistencies across the product line.
- Built a **browser extension** that auto-generated message IDs for the internal work interface, removing repetitive manual steps for the team.
- Shipped 4 marketing-focused features end-to-end, contributing to 40% revenue growth as part of a company-wide initiative.

MERN Stack Developer — MyAppBroker (Freelance) Jan 2025 – Mar 2025

- Built a freelance consultancy website using **React and a Node.js backend**, increasing form submissions by 30%.
- Integrated **Firebase authentication** and backend form validation logic, cutting invalid submissions by 36%.
- Designed a reusable component system and maintainable codebase architecture for smooth client handoff.

PROJECTS

WhatsApp AI Agent May 2026

- Built a production Node.js/Express backend that processes WhatsApp customer queries in real time using **Groq LLM**, currently piloted with a restaurant client.
- Designed a stateless Express architecture to route, process, and respond to messages reliably via **Twilio webhooks**.

TinyLink — URL Shortener & Analytics Feb 2026

- Built a full-stack URL shortener with complete **CRUD operations** and database-backed click analytics using Prisma ORM.
- Implemented edge-fast redirect logic, a health check endpoint, and real-time click/metadata tracking for every link.

Matural.shop — E-Commerce Platform Feb 2025 – May 2025

- Built and deployed a full MERN-stack e-commerce platform serving 1,000+ monthly active users with JWT authentication.
- Integrated Razorpay checkout and **Cloudinary media optimization**; improved Lighthouse SEO score from 72 to 91.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), **TypeScript**, React.js, **Next.js**, Node.js, Express.js

Databases: **MongoDB**, PostgreSQL, Prisma, JWT, Convex

Backend: REST API design, **authentication** (JWT, Firebase Auth), server architecture

Tools & Platforms: Git, **GitHub**, **Vercel**, Postman, ESLint

CERTIFICATIONS

The Web Developer Bootcamp — Udemy (Colt Steele), 74 hours, Apr 2024

Artificial Intelligence Builder — FITT-IIT Delhi, 80 hours, Jan–Mar 2024

EDUCATION

Electronics & Telecommunication Engineering

Jabalpur Engineering College, Madhya Pradesh |
